# CLUB PROGRAM

One of the most important keys to our High Performance program is that all our players join a Spanish club in the evenings to train and play La Liga. The club is assigned based on the player's age and playing ability, and can be a 1st, 2nd, 3rd, or 4th Division club in Spain. Our coaches monitor the player's performance weekly and we make sure that player integrates well in his new Spanish team. Our private transfer take the players to the practices and games in weekends. 3/4 Training Sessions + Official Game.

In order to play official league matches with the club, a **FIFA licence is required**. This FIFA licence does not depend on SSA, and is therefore not guaranteed in the Study Programme.

- Obtaining a FIFA licence depends exclusively on the coaches of the PARTNER CLUB. **They decide whether or not to sign a player to compete in the Official League depending on his performance and the criteria of the COACH OF THE PARTNER CLUB.**
- The student must **meet the requirements** of the RFEF and FIFA to obtain his FIFA licence to play in Spain.
- The minutes of play played by a player during league matches at the PARTNER CLUB **depend strictly on the decision of the club's coach**.

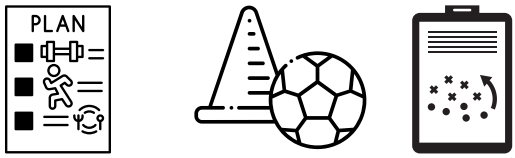
# CLUB PROGRAM

# SSA TRAINING PROGRAM

Our SSA method is based on our personal experience as players, managers and coaches, having been involved with clubs such as Real Betis and Sevilla FC – considered to be amongst the best football academies in La Liga – as well as with the Spanish national football team

5 training sessions per week led by professional coaches from Spain Soccer Academy

Professional training in small groups, tailored to each player's position to enhance their tactical, technical, mental and physical development.



# SSA TRAINING PROGRAM

# FUNCTIONAL ASSESSMENT OF PHYSICAL CONDITION

All players are individually monitored, comparing their physical performance:

- Intermittent endurance, explosive strength, speed, flexibility, and a complete body composition study.

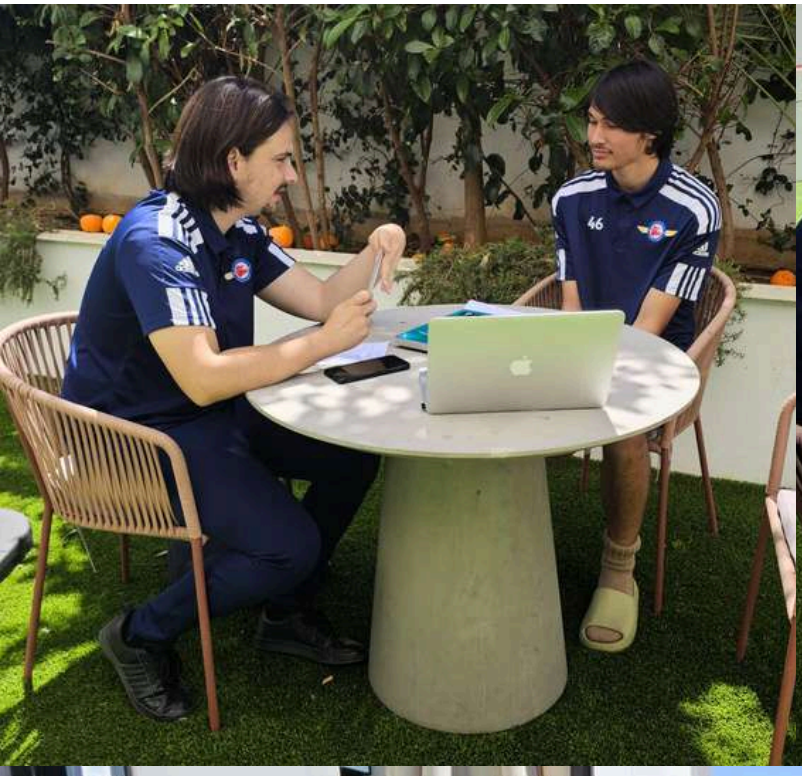
Due to our experience in the League, we have data on all the professional players we have trained over 20 years, and we apply the same physical tests to our SSA players. This allows us to determine each player's level depending on their position and compare it with professional players in that same position. This allows us to establish individual physical performance improvement plans that are effective for improving playing ability.

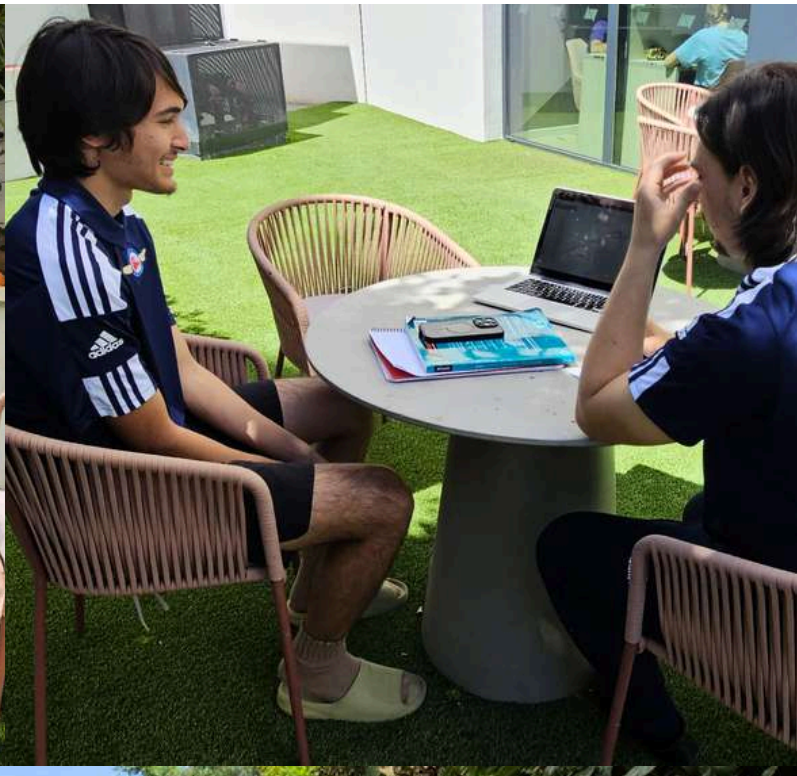
# NUTRITIONIST SERVICE

At Spain Soccer Academy, we take into account all the aspects that affect the performance of the players, that is why we monitor the established diet, quantities, and the necessary and routine controls are carried out for the evaluation and improvement of the soccer players.

# PSYCHOLOGY SESSIONS

At Spain Soccer Academy, attention to the mental health and emotional well-being of our players is a top priority. Psychology sessions are designed to create a safe space where players can express their concerns and emotions. These sessions not only focus on listening to athletes, but also include assessments to identify areas for improvement on both a personal and sporting level. By working in collaboration with psychology professionals, we aim to strengthen mental resilience, build self-confidence and improve players' overall performance on the field. This holistic approach ensures that our players not only develop as athletes, but also as balanced and self-aware individuals.





# VIDEO ANALYSIS SESSIONS

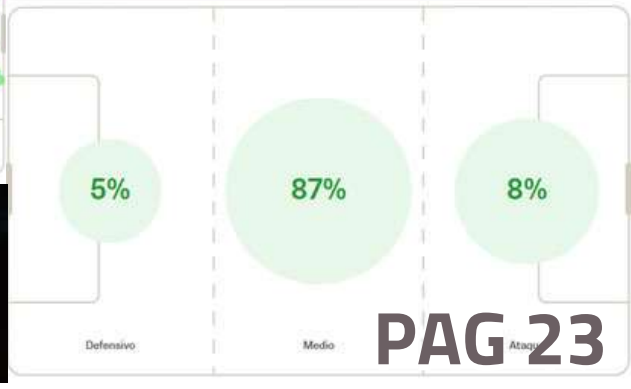
## TECHNOLOGY APPLIED TO IMPROVE DECISION MAKING

SSA TACTICAL METHOD: we have the VEO technology for recording matches and we make quite in-depth use of all its applications. The most important thing is the analysis that our professional SSA COACHES make of all the images that VEO provides us.

The players receive weekly videos analyzed by our professional coaches so that they understand each game situation both in defense and attack and can improve their positioning and decision-making. This analysis has three phases:

1. Team Analysis: Defense - Attack,
2. Analysis by Positions (Goalkeepers, Defenders, Midfields and Forwards).
3. Individual analysis since VEO allows us to use artificial intelligence AI to observe all the individual moments of each of our players. This tactical program will make the player really learn at the end of the season how professional players in his same position perform: both with and without the ball.

The experience we have acquired over these years developing this program allows us to guarantee our players surprising tactical growth in just a few months.

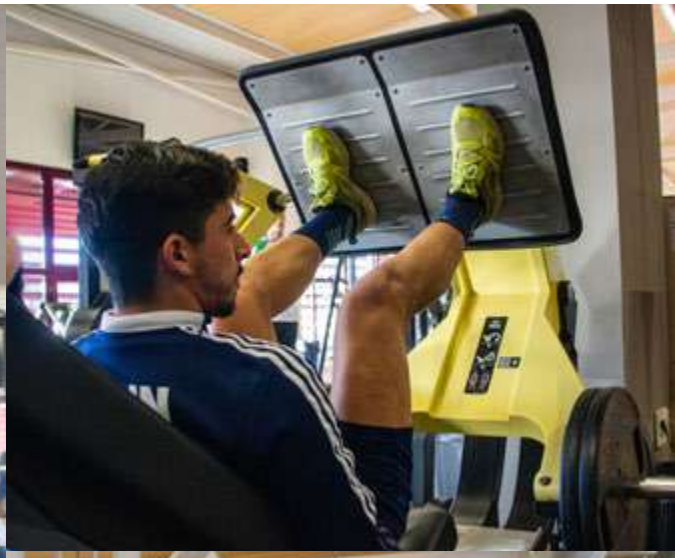


# VIDEO ANALYSIS SESSIONS

Our High Performance Program is based on daily feedback from our coaches to the players, both in the training pitch during the proposed exercises and in the video room where the matches are studied weekly to learn from successes and mistakes.

# GYM SESSION

SSA players attend a gym session per week with our Physical Coach where the work done on the football pitch is complemented. Our players have a University Card for the daily use of the Gym from Monday to Saturday, with a Personalized Program if the coaches consider it appropriate.



# ACADEMIC 1: SPANISH COURSES - C. MUNDOLENGUA

We have signed a contract with Centro Mundolengua, a benchmark school with undisputed experience in language teaching. Thanks to the quality of his programmes, its centre in Seville has been accredited by the **Instituto Cervantes**.

The Instituto Cervantes centre accreditation system is the only international accreditation focusing exclusively on the teaching of Spanish as a foreign language. Among its objectives are the promotion and teaching of the Spanish language and the dissemination of Spanish and Latin American culture.

Centro MundoLengua's proposal goes beyond language and culture. We want to bring our students closer to Spanish REALITY.

**Classes are held from Monday to Friday, 10 hours a week.**

# ACADEMIC 2: YAGO SCHOOL

- Yago School inculcates in its pupils a marked international character. Our mission is to contribute to the development of the intellectual, personal, emotional and social skills necessary to live, learn and work in an increasingly interconnected and globalised world.
- **Yago School** enters **Forbes**' **TOP 100**! 🏆👏 The prestigious #Forbes magazine has once again recognized Yago School's work and commitment, including us in their exclusive list of the **Best Schools in Spain 2025**.

# ACADEMIC 3: LYCÉE FRANCAIS INTERNATIONAL

- **French International High School**. The educational system of the Liceo Francés Internacional in Seville allows our students to take advantage of the best of the **French and Spanish education** systems. Each stage of our education system is approved by both the French Ministry of National Education and the Spanish Ministry of Education, Culture and Sport, which allows the mobility of our students between both educational systems.
- In this way, our students will obtain the double degree at the end of their studies: **Baccalauréat and Bachillerato.** As for access to the University, the Baccalauréat is internationally recognized, enabling our students to enjoy privileged access to selective careers.

# ACADEMIC 4 : UNIVERSITY PABLO OLAVIDE - USA ONLINE HIGH SCHOOL

4. In the afternoons from Monday to Thursday in our residence our players receive help from our teachers with Spanish and homework.

# TRAINING METHODOLOGY

The SSA Method is a training plan of actions aimed at sports, human growth and self-knowledge of football players, which begins when an athlete with sports talent, personality and a character of his own arrives.

The 3 fundamental parts of our method are:

- **Train for Life**: it is based on the training of emotional intelligence (self-knowledge, self-control, self-motivation, social skills, leadership, courage ...) that will be transferred to training, competition and life situations.

- **Train the Spanish Game Model**: the way Spanish professional teams train and compete, with their own style of play, a positive attitude and control of the ball in both attack and defence. We have developed the playing style of the Spanish national team, winners of the 2026 World Cup
- **Education and Attention to the Footballer**: The objective is that the soccer player be supported by professionals: mentors, professors, psychologists, nutritionists, physiotherapists, coaches, teammates.

And at the same time that he plays football is formed in academic studies or in the learning of a new language like Spanish, investing time in his educational training.

I'm writing to share my thoughts on Spain Soccer Academy. This is my second year here, and I absolutely love it! Everything is great, including the rooms and the residence. The training is top-notch, and we get to play nice professional games. I really want to thank all the coaches for their effort; they've helped me improve a lot. I also appreciate all the staff here.

I love that I can study and play football at the same time, which is really good. Plus, we have gym facilities and following a nutrition program, so I feel like I have everything I need to work on my game. I'm so proud to carry the Spain Soccer Academy logo on my chest. Being here feels like being part of a second family. I would definitely recommend this academy to anyone looking for a great soccer experience!
